First CIRCULAR

On behalf of the Local Organizing Committee, we are delighted to invite you to the **40th International Cosmic Ray Conference** **(ICRC2027)**, to be held in **Buenos Aires, Argentina, July 20–29, 2027**, at the campus of the Universidad Católica Argentina (UCA).

Since its inception in 1947, the International Cosmic Ray Conference (ICRC), organized under the auspices of Commission C4 of the International Union of Pure and Applied Physics (IUPAP), has served as the leading international forum for the presentation and discussion of advances in **cosmic ray physics, high-energy and gamma-ray astrophysics, neutrino astrophysics, dark matter research, solar and heliospheric physics, multi-messenger astronomy, gravitational-wave science, and related instrumentation and data analysis.**

ICRC2027 will mark the fourth edition of the conference to be hosted in Latin America and the first ever to take place in Argentina. Buenos Aires, a major cultural and academic center in Latin America, will provide a lively setting for scientific exchange and for welcoming the international cosmic-ray community.

Registration for ICRC2027 will open on December 15th. Further information on registration, abstract submission, accommodation, and the scientific program will be announced in due course.

We look forward to welcoming colleagues from around the world to Buenos Aires for a stimulating scientific program and a vibrant exchange of ideas. We hope that ICRC2027 will provide an inspiring environment for scientific discussion, collaboration, and cultural exchange, and that it will become a memorable chapter in the history of the International Cosmic Ray Conference.

Best regards,
The Local Organizing Committee of ICRC2027
